

SafeSeal Closure System

Containment-Level \leq OEB 5 ($<1\mu$ g/m³)

Closure System

SafeSeal from Lugaia – simply ingenious or ingeniously simple?

The manual SafeSeal Closure System for Continuous Liner Systems (patented)

The SafeSeal Closure is manually (<1µg / m³) in action with Lugaia closure system consists of SafeSeal pulled over the bag and compressed with special locking pliers. The crimp can then be separated using a cutting antees Containment-Level OEB 5 tional cutting processes. The entire

Continuous Liners and thus forms Closure clips, a crimp and a cutting the spearhead of the manual lock tool and it can be completed with a systems. Through the deployment of protective cap and hanger. tool. Crucial for the closure size is the the SafeSeal Opener, the closure can foil size. The SafeSeal Closure guar- be removed again without any addi-

The Lugaia SafeSeal Crimp in 3 different sizes: S (blue), M (red), L (green) (Double clip with axial locking mechanism)

The advantages of the SafeSeal Closure System:

- Easy handling
- High occupational safety
- Universal usability
- Low investment costs
- High quality
- Axial closure mechanism
- Guaranteed OEB 5 (<1µg / m³) Containment-Level • 3 different sizes
- Can be expanded with a protective cap and hanger

Toolset Type 90 and Premium Toolset

Safe and ergonomic tool for closing and separating the SafeSeal Crimps

give you effective, qualitative and high-quality tools specifically designed for handling the Lugaia Safe-Seal Closures to close and separate the Continuous Liner System (CLS) properly. A Containment-Level of OEB 5 ($<1\mu$ g / m³) is guaranteed. Each toolset contains one pair of ratchet scissors as well as locking pliers.

With the SafeSeal Toolsets we Both sets are useable for all SafeSeal Closure sizes. With the Premium Toolset we give you the best handling in combination with the best materials, the handles are rustproof and made of anodized aluminum. Due to corrosion resistance, the Premium Toolset is also very suitable for the process of cleaning and washing in the isolator.

Both Toolsets are available in a practical tool case! (Contents: locking pliers and ratchet scissors)

The advantages of the Lugaia Toolsets:

- Easy handling
- High occupational safety
- Low investment costs
- Also available as a premium version, rustproof handles made of anodized aluminum

Lugaia SafeSeal Pneumatic Tool

With the SafeSeal Pneumatic Tool (available for SafeSeal Closure size M and L) a partially automated closing system was developed, which excels with simple operation, high work safety, universal usability and high quality.

In connection with the SafeSeal Closures and the foils of the Lugaia Continuous Liner Systems (CLS: for standard sizes, see separate product sheet) a Containment-Level OEB 5 (<1µg / m³) is guaranteed.

The SafeSeal Pneumatic Tool is used at the end of line packaging with high filling rates.

How the SafeSeal Pneumatic Tool works

SafeSeal Pneumatic Tool

Activate opener

Insert SafeSeal Crimp

Close

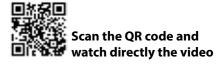

Two-hand operation

Removal

The advantages of the SafeSeal Pneumatic Tool:

- Automatic pressing and cutting of the SafeSeal Closures
- Completely pneumatic operated (suitable for ATEX)
- Made of stainless steel
- High security through two-hand operation
- Integrable in existing systems

Protective Cap and Hanging System

SafeSeal

Opener

SafeSeal Protective Cap and Hanging System

The proven and patented SafeSeal Closure System (for crimp sizes M and L) ensures a safe closure for any foil system at Containment-Level OEB 5. To further develop the safety and ergonomics of SafeSeal, the system was expanded with an additional protective cap and a practical hanger.

SafeSeal Opener

A sealed Liner package can be opened without additional cutting processes or the use of pointed tools; using the SafeSeal Opener (3 sizes), it can be re-opened without any problems.

Using the Opener, the SafeSeal Closure will be separated and pushed apart very quickly.

Scan the QR code and watch directly the video

Opening the lock size M (lock size S opens identically)

Break open the safety brackets on both sides

Opening the protective cap (suspension system can be opened identically)

Loosen the cable tie cover Installed protective cap

The advantages of the protective cap and the hanging system:

- Cover of the SafeSeal-interface
- Additional security of the closure systems through the use of SafeSeal Closure and cable ties
- Safe suspension of the foil packaging
- Easy to open with the SafeSeal Opener

Attaching the Protective Cap

Assembling the Hanging Tool

Lugaia SafeSeal Closure

Put on the protective cap

Put on cable ties

Tighten cable ties

Tighten cable ties

Slip the hanging tool on

6

Insert the opener, the outer crimp opens Separate the crimps

Separate the crimps

Loosen the cable ties
